

Current qmlproject

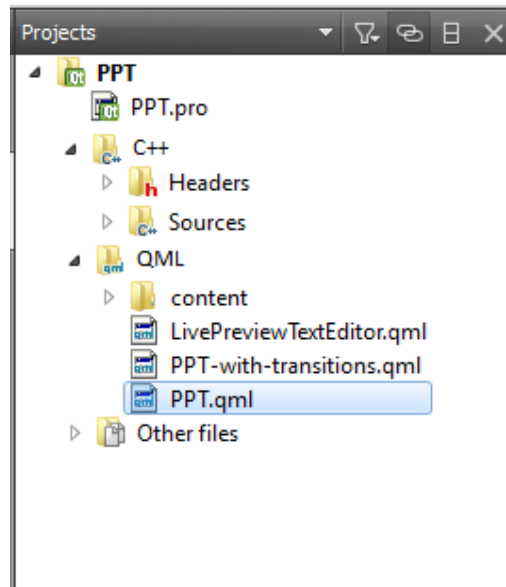

Qt project

Qt project for QML Mock-up

```
OTHER_FILES = ../../PPT/*. * \  
                ../../PPT/content/*. *
```

A step further would be an approach where we distinguish more clearly between:

- C++ source files (.h, .cpp)
- QML files (.qml, .js)
- Other files (mainly images: .png, .gif, .png, .psd)
